CONSULTAZIONE PUBBLICA

Consultazione pubblica sulla valutazione delle norme in materia di fatturazione

Lo scopo della consultazione è raccogliere i dati e gli elementi necessari per valutare le norme in materia di fatturazione introdotte dalla seconda direttiva sulla fatturazione (direttiva 2010/45/UE). A tal fine, la consultazione punta a raccogliere i pareri delle parti interessate su questi punti: in che misura la seconda direttiva sulla fatturazione ha raggiunto i propri obiettivi? In che misura le norme sulla fatturazione coincidono tuttora con i bisogni delle parti interessate? Inoltre la consultazione mira a raccogliere le opinioni delle parti interessate su possibili approcci a una riforma delle norme.

Partecipa entro il 20 settembre 2018: <https://goo.gl/vzi3mx>

Opportunità di mercato

Di seguito si riportano, a titolo di esempio, alcune richieste/ offerte di cooperazione.

Slovenian leading development company in the field of photogrammetric measurements and data capture with pilotless drones is looking for distributors (BOSI20180723001) A Slovenian leading development company in the field of photogrammetric measurements and data capture with pilotless drones, which is considered as a "game changer" in the field of geospatial analysis is looking for distributors.

Business Request

Danish company seeks subcontractors for print on POS and merchandise materials (BRDK20180815001) A growing Danish company specialised in digital printing is looking for printing houses to print, under a subcontracting agreement, on a variety of merchandise and POS materials, from cups to umbrellas and clothes. Printing on unusual merchandise materials is also interesting.

UK designer of a tablet device to aid the care of people with memory or technology comprehension issues seeks manufacturing agreement (BRUK20180824001) For 7 years, this UK designer and supplier of a smart tablet device has been successfully helping to aid the care and monitoring of both elderly people and those who find modern technology difficult. The award-winning software and device is constantly being developed by the company to provide the user with a better product to appeal to a wider market. Therefore the company is looking for a suitable overseas supplier of a quality tablet device for a long-term manufacturing agreement.

Chinese Anti-Counterfeiting Technology Company Looking for qualified European Partners to diversify its products portfolio (BRCN20180411001) A Chinese anti-counterfeiting company in the packaging industry is looking for qualified European partners to introduce advanced laser holographic anti-counterfeiting technologies/products into China. The qualified partners should have expertise in security holography and been equipped with advanced holographic origination technologies.

Raw materials for the production of sanitary ware requested under manufacturing agreement (PL20180620002) A Polish company has been operating in the bathroom furniture and furnishings industry for nearly 10 years. The firm specialises in the production of sanitary ware (washbasins and bathroom countertops). They are looking for suppliers of new materials (other than conglomerate or solid surface that they've been using so far) that can be used to manufacture the products. They are interested in the manufacturing agreement.

Qatari company specialized in the manufacturing & trading of plastic items is looking for a supplier of flexo printing inks, thinners and solvents through a manufacturing agreement. (BRQA20170821001) Qatari company founded in 1993 specialized in high-density polyethylene (HDPE) and low density polyethylene (LDPE) products is searching for a supplier able to produce flexo solvent base inks as well as thinners and solvents. The company would like to sign a manufacturing agreement with suppliers .

Technology Offer

Retrofitting of a one-megawatt biogas plant or for newly constructed plants (TODE20180808001) A German company, active in the machine tools sector, has developed a container with digestion technology for a biogas plant. The advantage of the technology is the increasing in biogas productivity and the possibility to insert diverse materials into the biogas plant via bio extrusion. The company seeks industrial partners from the agricultural sector for further development of the technology under a technical cooperation agreement or for a commercial agreement with technical assistance.

Technical cooperation for concrete and cement strength testing instruments (TOUK20180822001) A UK company that has developed new innovative instruments for the swift testing of cement and freshly mixed concrete on compressive strength, seeks technical partners under a technical cooperation agreement or research partners under a research cooperation agreement.

Selective capture of carbon disulfide and other toxic compounds (TOES20180411002) A Spanish Research Institution has developed a family of compounds capable of capturing carbon disulfide (CS₂) in a reversible and selective way. The selective attachment of CS₂ or similar molecules as carbonyl sulphide, can be used for example in selective detectors since it involves a colour change. Companies from the chemical industry are being sought to collaborate through a patent licence agreement.

Modular multi-panel system, easy assembly and disassembly with no glue, no screws, no external fixtures (TOCH20180821001) A Swiss school of technology has developed a modular multi panel system which can be assembled without any external fixtures. The system is mechanically stable and self-centering. The multi panel system can be used to build mobile radar reflectors. Other applications include temporary installations such as shelf systems, exhibition stands and stage accessories where quick assembly and disassembly play a role. Licensing agreement partners for the introduction to the market are sought.

Innovative technology and equipment for extraction of bio-active substances from herbs and spices (TOBG20180828001) A Bulgarian research institute has developed an innovative technology and equipment for extraction of bio-active substances from wild or cultivated plants using solvent extraction techniques. It can be applied for extraction of various agents such as pharmaceuticals, nutriments, flavors, colorants, etc. The exhausted vegetable mass is environment friendly. The unit seeks industrial partners under commercial agreement with technical assistance.

Technology Request

An Israeli company offers to analyze the genome data in order to find new medications and new uses for existing medicine looking for a Joint-Venture/Technological cooperation agreement (TRIL20180808001) An Israeli company is seeking partners for joint-venture/technological cooperation agreements, who can provide large numbers of people/subjects on which research has been done containing genomes. Subjects who had specific ailments/diseases are also of interest in order to analyze data through the developed program with the aim of rapidly discovering if-and-only-if rules that exist between the protein-coding gene and the disease. These rules can then point at possible medications.

Lithuanian company is looking for an automated loading/unloading robotic solution (TRLT20180705001) A Lithuanian furniture manufacturing company is looking for a robotic solution to make part of their processes more effective. The company is looking for a conveyor line solution that would enable loading and unloading lorries with goods more efficiently and without a need to use a forklift. In the best case scenario they would like to sign a commercial agreement with a technical support from a technology supplier.

A Chinese company is looking for evaporative cooling technology (TRCN20180814002) A Chinese company provides technologies in fields like electromagnetic equipment. The company is looking for evaporative cooling technology, to cool electromagnetic mixers. They are seeking partners in academia or industry, for technical and research cooperation agreements.

Polish e-commerce software house is searching for online stores using the Shopify platform interested in testing new apps (TRPL20180813001) Young Polish company is currently developing apps for the Shopify platform that will help store owners gather more insights into the behavior of their customers. They want to make their product most efficient and for that they need feedback from potential clients who would test their new apps. The e-commerce software house is looking for research cooperation agreement.
